VOLUME XIX. No. 18

EMPRESS, ALTA. THURSDAY, Oct. 1st, 1931

Price: \$2.00 Per Year.

United Church

Social Plains, 2.00 p.m.
Leland, 3.30 p.m.
Empress:
Sunday School, 2.00 p.m.
Public Worship, 7.30 p.m.
Please remember the hour of public worship and come and worship with us.
Rev. Geo. A. Shields,
Minister.

The regular monthly meeting of the Empress Chapter of the I.O.D.E. will be held at the home of Mrs. J. N. Anderson, on Tuesday, October 6th, at 3 p.m., sharp.

Farming Proposed On Contract Plan

London, Sept. 25.—A suggestion that farm crops be produced on contract, much like shoes or shaving soap is manufactured on dealers' orders, was made at the centenary meeting of the British Association for the Advancement of Science today.

It was made by Sir John Russell, whose paper on "The Changing Outlook in Agriculture" sought to answer the British farmer's question of supplying food requirements to the country without piling up surpluses which injure the grower without benefitting the consumer.

For Sale or Rent

A Six-roomed House for Sale, \$500 cash, or rent on easy terms. Also Household Furniture for sale.—Apply, *Empress Express* office.

EMPRESS DRUG CO., Ltd.

Rowles-Jackson

The marriage took place on Friday, September 25, at four o'clock in St. Augustine's Church, of Mildred Constance, eldest daughter of Mr. and Mrs. Wm. Jackson, of Estuary, Sask., to Mr. Alexander W. Rowles, youngest son of Mr. and Mrs. Wm. Rowles, of Empress, Alta. The ceremony was performed by Rev. O. M. K. Parsons.

Following the ceremony a dainty lunch was served at the home of the bride's parents. The room was beautifully decorated with cut flowers.

Guests included near relatives of the bride and groom. Mr. and Mrs. J. Harvey Ferguson, Mr. R. W. Haum, and Mr. N. Davies.

Cream Market Report

For the week ending September 19th, 1931, the following prices were paid by creameries per pound of butterfat, in the several grades of cream, and at the points shown:

Edmonton, Special, 18c; No. 1, 16c; No. 2, 13c.
Calgary Creameries, special grade, 17c; No. 1, 15c; No. 2, 12c.
Minimum: Special grade, 16c; No. 1, 14c; No. 2, 11c, off grade 6c.

The town of Leader suffered a disastrous fire loss on Friday, September 18, when the Kraus garage was destroyed. Four cars were also burned. The loss sustained in building and contents is estimated at \$16,000.

Good Attendance At Rally Day Service

On Sunday morning, the scholars of the United Church Sunday School, took part in the usual Rally Day program in the Church. The awards of Diplomas and Seals were given and promotions made known. There was a very good attendance present.

Festival of Light Honors Faraday's Famous Discovery

London, Sept. 31.—Fifty six cities, from Newcastle in the north to Torquay on the south coast, joined in a festival of light last night in honor of Michael Faraday, who made the electrical dynamo possible and whose centenary is now being celebrated.

It is estimated that 120,000, 000 candle power illuminated the cathedrals, churches, historic castles, municipal and other buildings, thus playing a part which beacons filled in early English history.

Among other places were the site of Faraday's birthplace in Newington and the little London bookshop where he worked as an errand boy and book-seller's apprentice.

The great electrical exhibition opens here today in which eight sections trace developments in electrical appliances due to Faraday's epoch-making discovery in 1831. —Science Monitor.

Redistribution of Labor Forces Held As Remedy for Idleness

Mr. Edwin Cannan, professor emeritus of political economy of London University, who spoke recently before a gathering of the British Association said: "The thoughtless outsider is apt to say that both unemployed and those still employed, should accept lower wages, and so by cheapening the product extend the demand. As a temporary palliative the measure may be reasonable, but evidently it is never the final solution of a difficulty."

"What diminution of demand calls for is a redistribution of labor forces, with fewer persons being allotted to the less branches of industry, the products of

Harvest Thanksgiving Service

On Sunday evening St. Mary's Anglican Church held their Harvest Thanksgiving Service. Mr. Alexander Patterson, student, conducted the main portion of the service; Mr. Brown, student, gave the sermon. The church which was filled to capacity had been very prettily decorated with grains, flowers, fruits and vegetables.

To Operate Hemaruka-Saspa Line After Freeze-up

It is unofficially reported that the Hemaruka-Saspa line will be made ready for transportation of coal and wood from the West and that operation will commence immediately after freeze-up.

Since the steel was laid last winter, the track has been idle and in many cases where the track had been laid through light land the high winds blew away sections of the gravel leaving sections of the track unsupported. An extra gang numbering thirty men has been engaged for the past few weeks straightening out the damage and reports are received here that this work is just about finished.

The new piece of railway is the last link in a new short route between the coal mines and the Battlefords. Import and savings in cost of fuel supplies will result from the direct service. —Budget, Lovers.

which are less in demand, and more to other branches;

"Increase a person's power of spending and he will not increase his purchases in weight for bulk so much as in refinement or form, so that richer people will devote less in proportion to their labor to producing things like pig iron and bricks." He added that many in the working class have been property owners and many in the propertied class have become paid servants of public companies and public institutions, so that the old sharp distinction between the capitalist and the wage earner is becoming a thing of the past. It is no longer a division between two classes, but a division between two sources of income.

While it is generally admitted

Planting Peonies

The desire to plant peonies is strongest about the first of the week in July when bloom is so prominent in this perennial flower. A start should be made at that time or well in advance of date of planting.

Select an area where soil is deep for your bud or plant where the sunlight is plentiful without receiving reflected heat. Avoid placing them near trees which have large roots or will be heavy on moisture with in their growth. The area selected should be trenched out two feet deep, working in an abundance of well-rotted manure. This is necessary because the plants are such gross feeders.

Autumn plants should be received about the middle of September and planted immediately. Extreme care must be exercised to see that none of the buds or eyes are injured as these are the life of the plant. In planting, set the eyes not more than two inches below the surface of the soil and pack the earth firmly around the roots. If the soil is not moist, a heavy watering is advisable even at planting time. The above procedure, followed at the Dominion Experimental Station, Scott, has given good results. A light, straw covering is necessary the year of planting only. Careful planting alone will not guarantee blooms in future years. Beds should be well cared for and an abundance of water applied until the middle of the summer. After bloom appears, water should be applied to the surface and not sprayed over the flowers. A dressing of rotted manure should be worked in, each autumn. —Exp. Farm Note.

ted that population has not increased in proportion to mechanized production and the standard of living of the people is not seeing the benefits of invention and machinery which should be available, still there is a vast number of wage workers, with a more powerful, though perhaps less in number, minded class than ever before. Redistribution of labor would help, but no doubtless integrity in trading is one fundamental. Commodities, food day.

Two Couples Wed In Four Minutes on Bay Line

Probably a new world's record for hasty marriages was created last week on the Hudson Bay railway at mile 314, when Archdeacon Faries of the Anglican church, passing through on the Can. National way freight, performed a double wedding in slightly less than four minutes.

The two couples arranged by wire that everything would be set for the happy event during the short stop the train would make. As soon as the engine chugged into the station the archdeacon rushed from the train and shot the question to the two pair in machine-gun fashion.

There is no time for hesitating in a wedding service on the Bay line, because there may not be another minister or priest along the line for another three months.

staples, stocks (minus watered pyramid) need to be controlled and sold at within real marginal values. Inflation and taking of large profits is one of our primary ills and its effects are international and complex.

Work In Sandpits Completed

The steam-shovel which has been working in the sand pits completed operations on Monday.

Here and There

(506)
From obscurity to world power is the record of Japan within the past fifty years, says Dr. Naawo Kanno, Tokyo University professor and chairman of the Japanese National Committee on world power congress, here on a tour of Canada and the United States and a passenger aboard the Empress of Asia. He attributed the growth of his country to her progress in engineering.

The British Bowling team which has played 16 matches in Los Angeles in the last two months, losing five and winning eleven of the games, sailed for England aboard the Duchess of York recently. They came out to win the American Bowling Trophy, but the five games lost were in that event, and they must wait next year for another attempt.

PIPES SKIRL

NEATH SIAM'S STANDARD

With the red, white and blue barred standard of Siam fluttering above them in the summer sunshine, pipes from all parts of Canada proudly marched and counter-marched in the grounds of the Banff Springs Hotel, Banff, Alta., during the recent Highland Gathering, which was graced by the presence of T.M. King, Prashadshook and Queen Rannal Bari of Siam and their suite and a large number of distinguished guests. His Majesty, who opened the festival by infusing the flag of St. Andrew, met an interesting character in the person of "Willie" Campbell, of New Westminster, B.C., who was a pipe on the personal staff of

H. M. Queen Victoria, when King Chulalongkorn of Siam paid an official visit to her, at Osborne House, Isle of Wight, in 1894. Piper Campbell gave a special performance for King Prashadshook at the Banff meeting. A new feature of the Gathering was a competition for representatives of the bands of the 11 Canadian Scottish militia regiments, which was won by Piper Hector MacDonald, of Montreal. Duncans and Highland sports rounded out an excellent program, with specially presented of Scotch light covers in the evenings. The picture shows the massed pipes, parading down the Esplanade last night (last) T. M. the King and Queen of Siam and Piper Campbell.

TEA

'Fresh from the gardens'

Courtesy and Safety

"Why is it," remarked the Observant Man, "that a man who may accidentally jostle you in a crowd, turns and says 'I'm sorry,' or 'I beg your pardon,' but who, when he gets behind the steering wheel of a motor car, throws all ideas of courtesy to the winds and acts as if he had no rights whatever, even the right to live?"

It is the unspoken law of this present age. A man ordinarily polite and courteous, who, if he bumped into another couple when dancing, or stepped on his partner's toes, would express his regrets, when engaged in motoring act, too frequently, like an ignorant, uncouth hound. He would hesitate to tread so much as a loud peep from another, thinks nothing at all of stealing the right-of-way at a road intersection, even from a lady, considers he has done something smart, and even derides or jokes those whom he has made his victims. Yet he is guilty of theft, not only in the moral sense but actually in a legal sense, because the law declares it an offence to take the right-of-way from another to whom it belongs.

Such a motorist, who, if standing on his own two legs on the shore of a lake would never even entertain the thought of pushing a non-swimmer into deep water at the peril of his life, nevertheless does not hesitate to crowd a fellow motorist—possibly a beginner in the art of driving—off the road at the risk of smashing the other's car and possibly seriously injuring or killing him.

And why is it that so many men, ordinarily polite and courteous, refined in language and manner, become abusive, profane and quarrelsome over some slight mishap on the road? What is it about a motor car, or the pleasure or business of motoring, that so completely changes many men, and women, too, from their usual tenets of conduct into the most disagreeable creatures, reckless and regardless of the rights, comfort and safety of others?

Is it merely because the motorist motor engenders such speed that the drivers of cars become reckless, heedless, for the time being, at least, are no longer normal human beings? Or is it that peculiar quirk in our human makeup that seems to impel us to do what both commonsense and the law says we must not do?

The conduct of not a few, but countless thousands of motorists is an unenviable mystery. No man, except he be a maniac, would think of throwing a virginal into another's face and thereby blinding him, but to anyone used to travelling on highways at night, and during the day, the vast majority of motor car drivers think nothing at all of driving past approaching cars with powerful, glaring headlights completely blinding for the time being the drivers of those other cars, and leaving terrible damage. Is it that they are just too lazy to be even bothered to dim their own lights for a few seconds?

Or is it something else, some petty meanness of disposition, some ununderstandable twist in their character which does not at other times display itself?

Yet and courtesy is such a fine trait, a simple thing, something that costs nothing, but which is the hallmark of the true gentleman. And how much pleasure it would add to motoring, for the time being, instead of a rude boorishness, because the universal habit of the road! And, oh, how much it would add to the safety of the road!

Governments provide rules and regulations governing the condition of cars, Automobile clubs and associations conduct campaigns of education; tests are provided for brakes, lamps, tires, steering gear, etc., and all serve very useful purposes. But a uniform, universal recognition and acceptance of the ordinary rules of courtesy by all motorists, and by each toward all would do more than any and all other things to obviate accidents by their present appalling bills for damages and irreparable loss of life.

For a nation we are striving with might and main and the expenditure of fabulous sums of money to combat tuberculosis, cancer, and dread diseases of one kind and another; we are engaged in conservation of our forests, our streams and water-powers, our fisheries, our minerals; we spend millions on research work to combat rust in wheat, grasshoppers, and other pests which destroy the proceeds of our agricultural labors,—yet we go blithely on taking human life recklessly, needlessly, maiming many more, and destroying millions of dollars worth of property, through the agency of the automobile, which to many has become a dread and a menace when it ought to be a joy and a blessing.

And such a little thing, such a simple thing, as the practice of a uniform courtesy would serve to revolutionize the situation for the better. Why not try it for a change? Let a little courtesy do its good work.

Alberta Oil Wells

Forty-Seven Million Dollars Expended in Drilling Operations

More than \$57,000,000 have been expended and more than a million feet of borings done in Alberta in the search for oil during the last thirty years, according to a compilation made by J. J. Carmichael, Lethbridge engineer. In all, some 407 wells have been drilled, not including the Rutledge field for which no details are available. Of the drilling done, 100 wells in Turner Valley have drilled 600,000 cubic feet—more than the province's total of 1,187,787 feet.

Hiking the Soft Way

We endorse enthusiastically the idea of the man who is crossing the continent in a wheel chair. We, too, have always felt that we should like to take a good, long hike, if we could do it sitting down.

White was the colour of royalty during some stages of Egypt's ancient history.

The Mother of Seven Children Used It for Diarrhoea

Dr. Fowler's Wild Strawberry

Mrs. Ray Driveworth, R.R. No. 2, Hagerstown, Ont., writes:—"I am the mother of seven children, and last summer one of them, 17 months old, was taken very sick with diarrhoea, and I thought he was going to die. I went 7 miles to see what my doctor had given my baby, and he came home with a bottle of Dr. Fowler's Wild Strawberry. I gave the child a few doses and she was soon well again. My other children all had diarrhoea at the same time. I gave them 'Dr. Fowler's' with the same results."

Japan's Population

Is Increasing By Nearly A Million Every Year

One or two competent writers on Japan have announced lately, with some confidence, that the population question in the Japanese Empire is becoming settled. Because the rate of increase was steadily slowing down, the figures of the 1931 census were enough to shatter this comfortable doctrine. The birthrate in Japan is not going down, it is going up. And the population is increasing at about nearly a million every year. That fact may not be as disturbing to the rest of the world as it sounds. The Japanese, for all their apparent need for emigration grounds, still show little desire to emigrate on any considerable scale. But the alternative is to convert Japan systematically from an agricultural into an industrial State.

DRAPERIES MADE NEW

"When we resumed housekeeping eight months ago I found my draperies had become faded from lack of sun and light on the line, hoping to renew the color. I had them dyed. The result was they became as good as new. I was heart sick until the happy thought struck me to dye them. I just dyed them a deeper green, and as I used Diamond Dyes they look easier to dye than with Diamond Dyes. They give the color a more natural color—when used either for tinting or dyeing—and never take the color of cloth as other dyes do."

Mrs. J.E.T., Montreal.

Preparing Relief Camps

Ontario Government Getting Plans In Shape For Emergency Payment of 30 cents an hour for an eight-hour day, with a deduction of 50 cents a day for board and 50 cents a month for medical services will be made to men employed in the relief camps being established in northern Ontario by the provincial government for the construction of the Trans-Canada Highway.

Official details of the administration of the camps were given by Hon. William Finlayson, Minister of Lands and Forests. Present plans are to get the camps into operation early in October.

There will be no military methods but provincial police will be available whenever required at the camps.

U.S. Increases Postal Rates

Rates To Canada and Great Britain Are Changed

New increased postage rates on United States letters and postcards mailed to foreign countries are now effective, the postoffice department announced. The rate on letters and postcards to Great Britain and Newfoundland was increased to three cents for letters and two cents for postcards. Rates to Great Britain, Newfoundland and the Irish Free State were increased to five cents for letters and three cents for postcards. The new rate on sixpence stamps to the United States is six cents for each additional ounce.

Douglas' Egyptian Liniment is an excellent hair wash for stock and moves corns in horses and quickly relieves bruises, sprains, swellings and stiffness.

Has Tame Butter Fies

A Philadelphia has developed what is said to be one of the finest collections of live butterflies in the United States. For many years Daniel G. V. Lanning has been a student of the beautifully coloured insects, raised them and tamed them. Now, he says they will alight on his paper while he is reading and not move until he is ready to turn a page.

Persian Balm invests every woman with a new sense of well-being. Fragrant. Cooling and healing. Dispels all roughness or chafing. Makes skin delightfully soft-textured. Every woman should use this precious toilet requisite. Daintiness—economy—refinement—Persian Balm achieves them in every instance. Softens and whitens the hands. Promotes clear and youthful complexion. All women who care for additional charm unhesitatingly choose Persian Balm.

Bears Killing Alberta Cattle Right to shoot bears in Waterton Lakes National Park and Newfangled Alberta, was sought by ranchers of the district. Cattle on ranches in the territory have been killed and carried within the park confines before ranchers were able to defend their cattle.

A newspaper man's son says that editors call themselves "we" so that the man who doesn't like the article will think there are too many people for him to tackle.

Workshops where blind men and women may earn a living are being established in Italy.

W. N. U. 190

PUT HIM OFF HIS PIPE

Indigestion and Acidity

A few months ago, I had an attack of indigestion and acidity, and had no appetite for meals, especially breakfast. I am a pipe smoker, and for several days I felt so ill I could not even look at my pipe. I decided to try Kruschen's Salts. A few days afterwards I found that the indigestion and acidity had gone, and for the last five or six years I have been in my usual good health. I can now enjoy my pipe-smoking, and in fact feel about as well as ever.

When your digestive juices fail to flow, your food lies in the system and ferments, thus causing the distress known as "indigestion." The little daily dose of Kruschen first stimulates the flow of the gastric juices, and then causes complete, regular and unobstructed elimination of all waste matter every day.

Woman Wins Air Derby

Aviator From Memphis, Tenn., Carries Off All Honours

Mrs. Phyllis G. Gault, of Memphis, Tenn., was officially announced as the winner of the transatlantic handicap derby from Santa Monica, Cal., after she had taken a large share of the honours at the national air race. The contest committees announced that Mrs. Gault had won the transatlantic cap race, in which 50 or more women men competed, with a rating of 109.19 points. She won the grand prize as well as the prize for the women's division. D. C. Warren, of Alameda, Cal., won the men's division of the race with 103.5 points.

Bronze Statue Honours Hardy

Unveiled By Sir James Barrie At Dorchester, England

Unveiling a lifetime bronze statue of Thomas Hardy, the work of Eric Kingston, here in Hardy's native Dorchester, Sir James Barrie, creator of "Peter Pan," told how nearly the world would be missing at least the late novelist's services. "When the child Hardy was born," said Sir James, "the doctor thought I had dropped him into a basket. But a woman stepped forward to make sure and found he was alive. A statue erected in his honour—Mr. Kingston could have done worse than give us that."

It is usually said to say that when a child is pale, sickly, peevish and restless, the cause is worms. These parasites range the stomach and intestines, causing serious disorders of the digestive and preventive of fat from deriving sustenance from the food. Miller's Worm powders, by destroying the worms, correct these ailments, and thus help to restore the organs to healthy action.

Co-Operative Wool

Manitoba and Saskatchewan Shipments Reach High Figures

The Canadian Co-Operative Wool Growers, western branch, report the receipt during July of 552 lots of wool at Regina, and of 502 lots at Portage la Prairie. The total Manitoba receipts amount to 200,624 pounds, and Saskatchewan receipts about 180,000 pounds. To the end of the eleven years have been shipped from Regina, seven from Portage la Prairie and one from Marchand. During the month four contracts were received from Manitoba sheepmen, covering 130 bales and thirteen contracts from Saskatchewan sheepmen covering 984 bales.

Drive Asthma Before It. The smoke of vapor from Dr. J. K. Kellogg's Asthma Remedy gives asthma no chance to linger. It eradicates the cause. Our experience with the relief-giving remedy shows how actual and positive is the succor it gives. It is the result of long study and experiment and was not submitted to the public until its makers knew it would do its work well.

High Quality Canadian Cattle Shipments of Canadian cattle to Great Britain have proven at times of such a high quality that the livestock sold on a par with Scottish home-bred best according to John Byers, secretary of the council of Western Beef Producers. The Canadian cattle he added, at some periods, had been sold in preference to the Irish importations.

"Pop, pop, pop!" "Don't talk that way, Oswald, I'm in the grocery business, not a fountain clerk."

Market For Canadian Apples

Big Campaign In France To Exploit Canadian Fruit

A consignment of more than a million Canadian apples soon will be on sale in automatic vending machines on Paris boulevards, as the first step in a big campaign to make France an important market for Canadian fruit.

The final details of the campaign remain to be settled, but French importers already have made a cash offer for 7,500 boxes of Canadian apples, realizing their superiority over the French variety.

At the same time, negotiations are far advanced, whereby a Canadian company will install 2,000 vending machines along the boulevards. It is expected that each machine will sell 60 apples daily at one franc each, which is cheaper than the retail price of apples in Canada.

This enterprise is the result of the initiative of the Canadian trade commission office, which also has just induced the French Ministry of Agriculture to grant a concession to Canadian exporters allowing them to store their apples at Le Havre without paying the customs duty until the apples are sold.

This concession on the part of the French authorities will permit the holding of fortnightly sales of Canadian apples at Le Havre. It is expected that such sales will be started shortly.

Previously, consignments on which the customs duty had been paid, remained unsold at Le Havre, causing a heavy cash loss to Canadian apple growers.

Byng May Retire

Has Accomplished Task Of Police Reforms In London, England

According to the Daily Mail, Lord Byng, former governor-general of Canada and now commissioner of the metropolitan police, intends to announce his retirement from the end of the year. The paper says Lord Byng, who has accomplished the task of cleaning up the west end of London and the institution of police reforms which he had set for himself when accepting the appointment in 1928. He is now anxious to retire to his Essex house, the newspaper continues.

Sir Trevor Bigham, deputy commissioner, who married Lord Byng's secretary, is expected to succeed to the commissionership, the Daily Mail declared.

Barred From U.S.

William Shier, 48, who was returning to his home in Gary, Ind., after being two weeks at the bedside of his mother in Newmarket, Ont., has been refused re-entry into the United States by United States immigration authorities. It is alleged that he entered the United States illegally seven years ago at Port of N.D.

"Matilda, would you sing something for our guests?" "Oh, I'll, dear, it is so late; and besides they are beginning to go." "Yes, but not quickly enough."

A writer says that "one cat burglar will not betray another." A sort of fellow-feeling, we suppose.

Many Years a Sailor Earl Jellicoe Held Office Of Junior Officer In 1888

It seems ages ago in this whirling world since the disastrous collision in the Mediterranean between the "Victoria" flagship of the fleet, and the "Camperdown," and it is almost startling to recall that Earl Jellicoe, Canada's distinguished visitor, was a junior officer on the ill-fated "Victoria." Though stricken at the time with fever, he plunged into the sea and was among those rescued—in his case to give further distinguished service on another flagship of the fleet. Earl Jellicoe took to the sea when young, as the "Victoria" went down in June, 1888; and he is far from being an old man.

Wanted Child Marriage Back Renewed attempts to abolish the Sarda Child Marriage Restraint Act forbidding marriage to children before the age of 14, have been made by Indian legislators. The authors contend that the Sarda Act constitutes an invasion of sacred religious customs of the Hindus, reaching back thousands of years and allowing children to be betrothed in marriage even in infancy.

The average farm in Belgium this year covers less than 15 acres. Much of the threshing in Belgium this season is being done by hand.

No Longer Billious—Thanks

Vegetable Pills

Two Vessels Are Now Loading Grain At Western Canada Seaport

Churchill, Man.—The thriving seaport of the prairies, Churchill, is on the eve of an achievement dreamt of half a century. In the late north country dusk, officials of the Dominion Government reached the harbour on the rocky bay shore for the inaugural overseas shipments of western grain, to be made this week.

Unloading of grain cars will go on earnest, under the attentive eyes of C. D. Howe, Fort William engineer, who designed the 2,500,000-bushel plant to handle grain faster than any elevator in the world except massive pool elevator No. 7 at Port Arthur.

Under the contractors' agreement with the government, the elevator was to be operating by Sept. 15, but actually the plant has been ready to go for several days.

Col. E. A. Dugan, chief engineer of the Department of Railways and Canals, and D. W. MacLachlan, engineer in charge of the plant's development, will examine not only the completed elevator but the progress of dock construction. Arrangements have been made for the arrival of two test-steamers in fast time, at about considerable work is yet to be done on the dock foundations.

With Col. Dugan and Mr. MacLachlan, who arrived here Sunday night from Ottawa, were Mr. Howe and Thomas Harding, Montreal shipping agent.

Mr. Harding, who chartered the test steamers for the Government, will supervise their loading for the long haul.

Favourable insurance rates for the inaugural shipments have been obtained, according to Mr. Harding, though in the case of both hulls and cargoes they are many times the rates from Montreal. Rates on hulls for this shipment are at 1 1/2 per cent. It is expected that these rates will be sliced substantially if the test cargoes are carried overseas.

Before the "Farnworth," which came from Newcastle-on-Tyne, England, in 13 days, is loaded and sent away, it is expected that J. R. Manion, Minister of Railways and Canals, will be at Churchill, representing the Dominion in the absence of Premier R. B. Bennett, who was unable to make the trip.

The "Warwick," second of the two vessels chartered by the Government to carry the 500,000 bushel test shipment of Saskatchewan grain, will be loaded after the former boat sets out across the bay. Ten days out of Montreal, the "Warwick" reached Churchill last Friday, September 11, one day after its sister ship.

Both vessels had easy trips through Hudson Straits, reporting little ice sighted, and sailors were enthusiastic about the natural bottle-neck harbour at the rock bound river mouth.

It is probable that the loading of the two steamers will be completed only near the end of this week. The great bulk of the grain, hauled

DIASTIC ECONOMIES

Rt. Hon. P. Snowden, Chancellor of the Exchequer in the British North American Government, whose budget speech gave details of new taxation.

from Saskatchewan in 350 grain cars, is yet to be unloaded into the elevator and extreme care is to be taken in loading and trimming the two vessels so that there will be no danger of the cargoes shifting on the open sea.

No difficulty is anticipated in piloting the boats through the straits before ice begins to move down from the north.

Churchill harbour has been free of ice for three months, and more than a month will elapse before ice begins to form at the Churchill River mouth. While the bay is free of ice the year-around apprehension has been expressed regarding the ice now at the entry to Hudson Straits between Labrador and Baffin Land.

Police Radio

Alberta Police Radio Network Is Extended

Edmonton, Alberta.—Alberta provincial police radio network will be extended within the next fortnight with the erection of broadcasting and receiving units at Grande Prairie and Peace River. The additions bring the A.P.P. broadcasting units to five, extending from the northern points to Lethbridge.

Announcement of the extension was made by Commissioner W. C. Bryan, head of the force.

Report Is Denied

Simla, India.—It was stated in official circles at Simla, the summer capital, that there was no justification for press reports which have appeared in London to effect that Earl Willingdon, Viceroy of India, may retire before the normal expiration of his term of office.

Teachers' Convention

The 47th Annual Convention of Western Manitoba Teachers' Association To Be Held At Brandon, Man.—The 47th annual convention of the Western Manitoba Teachers' Association will be held in Brandon, Thursday and Friday, October 1 and 2. The regular sessions will be held in the collegiate auditorium and the Thursday evening meeting, which is open to the public, will be held in St. Paul's church auditorium. Dr. J. B. Matheson, chairman of the school board, will give the address of welcome and Dr. R. C. Evans, president of Brandon College, will be the speaker of the evening. Musical numbers will be given by the Kemnay School choir.

The convention will be addressed by Hon. R. A. Hoey, Minister of Education, and Hon. D. G. McKenzie, Minister of Natural Resources. The junior high school section will be in charge of Andrew Moore, inspector of high schools for Manitoba.

German Fleet Below Limit

Could Have Twice As Many Ships Under Versailles Treaty

Geneva, Switzerland.—Germany's arms statement showing an armament of 100,000 men and 4,500 officers is published by the League of Nations secretary.

Foreign Minister Julius Curtius in a foreword said that Germany had not yet been able to build her fleet up to the limit laid down in the Versailles treaty and that the report revealed "how meagre Germany's armament is compared with other states of corresponding territory and population."

"The navy possesses for example only four commensurate ships of the line, whereas according to Article 181 of the Versailles treaty and the regulations of the inter-allied marine control commission six ships of the line should be in service and two ships of the line in reserve, in other words twice as many."

Receives Grain Award

Wins Alberta Championship For Best Field Of Grain In Province

Red Deer, Alberta.—Alberta championship of 1931 for the best field of grain in the province has been awarded to James Hallett, farmer of the Balmoral district. Hallett, whose farm is a few miles from Red Deer, captured the southern Alberta crown and later his field was given top place in the whole province.

According to the judges Hallett's field of Marquis wheat should yield 90 bushels per acre.

Tentative Date For Radio Hearing

Ottawa, Ont.—About December 10 is the tentative date for the hearing of the radio reference before the judicial committee of the Privy Council in England, according to latest official information received. The reference is on the question of the respective rights of the Dominion and the provinces on radio broadcasting and receiving.

Mexico Will Join League

Mexico City.—Mexico's acceptance of the invitation to join the League of Nations has been called by Geneva Foreign Minister Genaro Estrada. The proposal must also come before the senate for ratification inasmuch as membership in the league implies adherence to the covenant and the Treaty of Versailles.

fur traders met their crowning misfortune. Their motor failed, and helplessly they were buffeted about among the ice floes until finally the vessel was dashed to pieces on the rocks. All four were able to reach land.

A touch of good fortune came to them in their discovering an abandoned Eskimo camp and adding the new supplies they had been able to salvage to the walrus meat found there, they eked out a precarious existence.

Last December, however, their plight became desperate. The rigors of the Arctic winter, combined with their total lack of nourishing food brought the four men to death's door. But again the gods of chance were with them, for as they were on the fringes of complete exhaustion they were found by a wandering band of Eskimos.

The natives fed them, tended them, and at length conveyed the four to the port of The Royal Canadian Mounted Police at Lake Harbour.

There the men were well cared for, installed in warm comfortable quarters and provided with sustenance that rebuilt them. When the "Boethie" put into Lake Harbour 10 days ago, the four castaways were taken on board and are now en route to North Sydney, N.S.

Here is a general view of the large crowd of Britishers which gathered in Downing Street, London, in which the Prime Minister has his official residence, to see what would develop following the downfall of the British Labour Government. When Ramsay MacDonald (right) left No. 10 Downing Street for Buckingham Palace, to confer with King George about the formation of the National Emergency Government, he was enthusiastically cheered by the great throng.

HEADS LEGIONNAIRES

Major John S. Roper, who became President of the Canadian Legion of the British Empire Service League when Lieut. Col. LaFleche retired, was re-elected to the important post when members of the Legion from all parts of the Dominion gathered in Toronto.

Arctic Trip Ended

Wilkins Making Preparation For Early Return To America

Longyear City, Spitzbergen. Sig. Hubert Wilkins is overhauling and refueling the submarine "Nautilus" in preparation for an early return to America, either direct or by way of Iceland.

The chief damage done on his cruise into the Arctic was the breaking of the mast by a violent storm. The radio apparatus also was harmed but repaired on the way back. The party expressed satisfaction with the working of its scientific instruments, especially the gyro-compass.

Members of the crew, hoarded and dirty, but smiling, headed for steam baths on arrival. They said that during the southward trip from Spitzbergen the vessel rolled more than at any time since they left the United States, and that some of them were seasick.

Will Continue Aid In West

United Church Of Canada Pledges Relief For Saskatchewan

Montreal, Que.—A new challenge to the Christian Church existed in the fact that "complete and extensive disaster had befallen the people of 40,000 square miles of southern Saskatchewan." Rev. William Munroe, D.D., secretary, declared in addressing members of the United Church of Canada, Montreal presbytery, here.

The presbytery appointed a special committee to aid the central body of the church in gathering and forwarding clothing and other relief material to the stricken community. It was emphatically stated that the church would stand behind its missionary work in Saskatchewan so that its company's annual meeting here that the province there would be fully maintained.

Death Rate Heavy

White Sulphur Springs, W. Va.—Arthur B. Wood, Montreal, vice-president of the Sun Life Insurance Company of Canada, said at the company's annual meeting here that the death rate among large policy holders was unusually heavy and claims for suicide particularly numerous during the past year. He said a committee composed of actuaries of leading companies has been engaged for some months past studying this question.

WHEN ENGLAND MET A CRISIS—AND WON

Heavy Loss Of Life Caused By Hurricane In British Honduras

Miami, Fla.—Between 200 and 400 persons killed, several hundred injured and city-wide destruction and damage to the homes of the residents of Belize, British Honduras, by a West Indies hurricane that swept across that city late Thursday, are the reports by radio by the Pan-American Airways here late Friday.

Meagre information of the devastating wind came in scattered messages from the flying company's airport at Belize.

One Pan-American plane, bound from San Salvador to Belize, dropped medical and other supplies into the harbour of the stricken city after picking up the relief shipment at Cayman.

First messages from Belize said the city was devastated, with 200 dead and great destruction of property.

Several hundred messages telling that several hundred were injured, and about half of the city blown down, was cleared here before the company's radio facilities was turned over to the colonial government of British Honduras, for solicitation of assistance in relief work.

It was not until Friday, September 11, that the revised estimate of dead was sent to Miami, headquarters of the Pan-American Airways.

London, England.—Fifty deaths are already reported and more than \$1,000,000 damage in the town of Belize as the result of the cyclone in British Honduras, according to a cable received at the colonial office.

Seventy per cent. of the buildings in Belize were destroyed, according to the official cable. It is feared the loss of life is greater than yet reported as a great number of houses collapsed during the hurricane, burying the inmates. The town was inundated by the sea to a depth of from five to nine feet.

The names of the dead are not yet known.

San Juan, Porto Rico.—San Juan counted two dead, another slightly injured and considerable minor property damage, Friday, as a result of a 110-mile-an-hour hurricane that struck Thursday night. Buildings damaged to the homes of the residents of Belize, British Honduras, by a West Indies hurricane that swept across that city late Thursday, are the reports by radio by the Pan-American Airways here late Friday.

It was not until Friday, September 11, that the revised estimate of dead was sent to Miami, headquarters of the Pan-American Airways.

London, Eng.—With axe and tax, Mr. Philip Snowden, Chancellor of the Exchequer, balanced the British budget. It was eminently a budget of national sacrifice. Its widespread net was flung over rich and poor alike.

It caught the drawer of the dole with a 10 per cent reduction in benefits. It hit the insured worker with a demand for increased contributions. It cut school teachers' salaries 10 per cent. It hit police, recruit and defence services, cut the salaries of members of the government and members of parliament and judges on the bench. It raised the income tax 12 cents on \$5.

The standard income tax rate will now be \$1.25 to \$5. It reduces income tax exemption of both married and single. It adds 10 per cent. to the

With Axe And Tax Hon. Philip Snowden Balances British Budget

super-tax; it imposes higher duties on beer, tobacco, snuff, petrol. It brings even the lowest priced entertainment within its sweep. Even the nickel show now pays a one-cent tax.

"This is one of the most disagreeable tasks that I ever had to do in my life," said Mr. Snowden, as he opened his statement. "It is no pleasant task to call upon people to sacrifice or to bear additional burden and only the consciousness that this sacrifice is necessary; that these burdens are necessary to avert a greater burden makes my task this afternoon tolerable."

Before Mr. Snowden rose painfully from his seat the House had been in a hubbub with rapid fire questions. As minister after minister was called to answer, the Labourites ironically cheered. It was from the Liberals and Conservatives who packed the government benches behind him that Mr. Snowden received applause such as few chancellors receive. The defiant challenge of his final sentence, "Come the world against us, England yet shall stand," brought them crowding to the front bench to offer congratulations.

It was a grave story he told — the estimated deficit this year was \$370,000,000, and next year \$500,000,000. The country must face up to its position," Mr. Snowden exclaimed as he drummed his despatch box with nervous fingers. "And I am going to do it this afternoon. The nation must be no more borrowing for the payment of unemployment benefits when the present borrowing powers were exhausted," he said.

He proposed to reduce the debt sinking fund appropriation both this year and next from \$250,000,000 to \$150,000,000. Deficits he proposed to meet in this wise:

Economies in expenditure \$110,000,000
Savings on debt redemption 68,500,000
Taxation, inland revenue 145,000,000
Customs and excise increases 37,500,000
Total increase 361,000,000
Old estimated deficit — 373,285,000
New estimated surplus 7,605,000

Four Scottish Castaways Are Rescued By Canadian Vessel In Far North

Ottawa, Ont.—The rescue of four Scottish castaways, marooned for many months on the shores of Frobenius Bay, the deep inlet which cuts into the south-eastern portion of Baffin Land, has been effected by the Arctic, left the Scottish port in a small motor ketch. What fortune befell them is not known, but the fact that the shipper of the Arctic, a trading vessel did indicate that misadventure were not foreign to them.

One of the four took the place of the dead man and went on the Arctic at Frobenius Bay. There the intrepid

fur traders met their crowning misfortune. Their motor failed, and helplessly they were buffeted about among the ice floes until finally the vessel was dashed to pieces on the rocks. All four were able to reach land.

A touch of good fortune came to them in their discovering an abandoned Eskimo camp and adding the new supplies they had been able to salvage to the walrus meat found there, they eked out a precarious existence.

Last December, however, their plight became desperate. The rigors of the Arctic winter, combined with their total lack of nourishing food brought the four men to death's door. Important Medical Discoveries

Use Of Hormones Has Produced Some Remarkable Results

Records of a girl saved from dwarfism, of insane persons cured by hormones, and the discovery that sugar can be fed to diabetics were reported to an endocrine symposium of the American Chemical Society at Buffalo recently.

Endocrines are the ductless glands whose secretions, the hormones, are held by some scientists to account for the differences between breeds. They govern to quite an extent height, slenderness or breadth, length of arms and legs, shape of face, quality of voice, distribution of hair or of fat on the body, possibly skin pigment, masculine characteristics in women such as deep voice, beard and masculine features, and even the emotions.

Chemists have been isolating hormones for several years. Their application to human health has been difficult, but some of the leaders of the medical profession reported on progress.

A girl who stopped growing at six was described by William D. English, M.D., of New York City. A growth hormone, extracted from the pituitary gland of animals, was given to mind up for a deficiency in secretion from the girl's own pituitary.

In less than two years she grew nearly three inches. The general height of her head increased six inches. Her weight rose 71 pounds.

Dr. English said the general medical profession can not obtain growth hormones because of difficulties about purifying them. He predicted these hormones will be available soon and with them certain diseases from the same gland that will control sex development.

Insulin, the hormone which relieves diabetes, is supplemented by diet doctors at Montreal General Hospital, described by Dr. I. M. Robinson, who said:

"Provided the fat content of the diet is kept at a very low level, it has been found that diabetes can, according to the severity of the disease, tolerate what have hitherto been regarded as impossible large amounts of carbohydrates (sugar) without the aid of insulin. We now have over 500 patients on these diets."

Progress In Electrical Development

Head Of Party Of Future Electrical Engineers Sees His Own Future For Canada

Charles Malgareto, president of La Cite Parlemont de Distribution d'Electricite, and head of the party of French electrical engineers, which arrived in Canada aboard the "Empress of Britain" recently, said in an opinion that Canada will see remarkable development in the field of electricity in the future. In the course of an interview at Quebec, Mr. Malgareto said:

"Although some of the best and most modern electrical plants in the world today are to be found in Canada, I am of the opinion that what the Dominion has seen accomplished in this field in the past, is nothing compared to electrical development which Canada will witness in the future. The factor of electrical utilization will always be much higher in Canada than in countries like France, because the Dominion possesses immense industrial organizations, such as pulp and paper mills, which need a tremendous amount of electrical energy, the whole year round, a situation which is the exception in a country like our own."

Nursery Stock Shipped East
A British Columbia coast firm has secured an order for nursery stock of 15,000 plants from a large firm in Eastern Canada. The order includes ferns, azaleas, polka and crocuses, says the market news letter of the Department of Agriculture.

For Boys' Calf Clubs
Twenty-eight Arriville better calves have been supplied by the Consolidated Mining and Smelting Company's farm at Trail this year for boys' better calf clubs.

"Would you care to lend five pounds to a friend?"
"I should like to, but unfortunately I haven't a friend in the world."

China Needs Sympathy Of Civilized World

Recent Floods Are Greatest Catastrophe In Nation's History

Although China always seems to be protruded under one calamity or another, the flood in the central Yangtze Valley is a new and different catastrophe, already outstripping all recorded precedent, and has therefore come down upon the dense population of a great, rich area comparable in many ways to the upper Mississippi Valley and taken it wholly off its guard.

The Yangtze River is a relatively well-behaved Chinese stream. Its volume varies generally from mid-winter to mid-summer, when melting Tibetan snows often raise it 100 feet above low-water mark in December and forty-odd feet at Hankow, but it has seldom in the past varied enough from its averages to catch the communities along its main course unprepared. Unlike the rivers of the northern plain, its course is sharply defined by almost continuous lines of hills from source to estuary. For more than 2,000 miles in Tibet and western China it flows through deep gorges, emerging at Ichang for a section of 1,000 miles to the sea down a valley seldom 100 miles wide. The bed is everywhere deep enough to make the valley floor to carry a great surplus volume of water, and where farms and villages descend into it dikes have been built that have always been a silent protection against normal summer floods. So the Yangtze does not cut the same ominous figure in China as the Yellow River.

Its explanation of the present calamity is that this year's body of flood water has since the beginning of the present century and the dikes have disappeared under its pressure. There is no way of estimating the damage that is being done and there is certainly no language that can convey an idea of the human misery that will follow. The magnitude of the disaster will dwarf anything that the Occident has experienced in its history and will be this winter's greatest claim to the sympathy of the whole civilized world.

Britisher Likes New Things

Knows Less About London's Antiquities Than American Visitor

The ordinary American in London has a better acquaintance with the city's antiquities than nine-tenths of the Londoners of the same order of intelligence and education. The Britisher is more interested in the Empire's far-flung colonial possessions—Kenya, Rhodesia, Egypt, Ashante, he likes to hear about new enterprise. At the drop of a hat he will turn his back on every story of turn and animal there built in the whole collection and travel half round the globe to make his home in a lonely, picturesque trading station, perhaps to lure a tribe of fuzzy-wuzzies and assume the white man's burden of trying to get fantastic adherents of his own creed to dwell together in some semblance of harmony.

Will Study Fur Farming

Maultho Provincial Government To Establish Breeding Farm

A twenty-acre plot for the Manitoba Provincial Government Fur and Game Farm has been selected just a few miles west of Winnipeg. The farm will be under the direct charge of Dr. J. H. Allen, V.S., B.V.Sc., and will be for the purpose of studying the best methods of raising fur-bearing animals. Game birds will also be raised and Mongolian and ring-necked pheasants will be hatched and released upon reaching maturity. Musk, marten, fisher and fitch will be stocked, and water enclosures will be built so that beaver, otter and muskrat can be propagated.

Might Lead To Confusion

A young barrister was conducting his first case. He was exceedingly nervous, and after he had proceeded with his speech a few moments the judge interrupted saying: "Mr. Blanche," he said, "as long as you conveniently called the plaintiff, whose name is Jones, by the names of Smith, and defendant, Smith, by the name of Jones, the jury and I could follow you, but now that you have introduced the name of Brown without indicating whether you mean it to refer to the plaintiff or defendant, or to both, there is just the shadow of a possibility that we may shortly become confused."

Will Improve Oyster Business

On behalf of the oyster industry, it is easy to realize at the discovery that oysters cure anemia. If this discovery reacts on the price of oysters in the same way in which a similar discovery a few years ago reacted on the price of liver, the oyster business will almost surely pull itself out of the depression during the season now about to begin.

Young Canadians Win Scholarships

Joining a list of 45 others at McGill University, three minor sons of employees of the Canadian Pacific Railway have just won a awarded scholarships.

McGill University, Montreal, covering a five-year free tuition. They are: H. B. Magge, son of H. B. Magge, station agent at Lac Joliffe; D. K. Gowans, son of D. K. Gowans, assistant general manager of H. B. Magge, station agent at Lac Joliffe; and Keith W. Shaw, son of W. A. Shaw, consulting electrical engineer. Messrs. Magge and Gowans will study architecture while Mr. Shaw will follow a course in chemical engineering. The scholarships were obtained. Ten of the scholarships for 1908 are still being held either by minor sons of C.P.R. employees or minor employees of the company. Mr. Magge, the recipient of the highest mark in the matriculation examination, is the son of H. B. Magge, station agent at Lac Joliffe. Mr. Shaw 730, and Mr. Shaw 720. Their ages are, respectively, 17, 18 and 17 years.

Canadian Grown Prunes

Prunes Of Best Quality Now Grown On Vancouver Island

An agricultural development of some importance to the fruit growers of Vancouver Island is likely to result from experiments carried out at the Dominion Experimental Farm at Sidney, B.C. Prunes of the best quality, especially Italian prunes, have been successfully grown and dehydrated at the station, according to the superintendent, E. M. Strang, and should be able to supply the entire demand. Dried prunes and prunes of the value of \$1,000,000 are annually imported into Canada.

Russia Making Gramophones

Soviet Russia is becoming "gramophone conscious." The first year, the few machines in Russia were imported. Then the government, realizing that the gramophone had its propaganda value the same as the radio, started a factory and turned out 6,000 sets. Now plans have been made to make 37,000 machines in 1931, and production of 25,000,000 records is another goal of the "five-year plan."

Poland expects to receive \$2,000,000 from its state lottery this year.

NEWEST MINISTERIAL APPOINTMENTS IN MOTHERLAND

Pullman House-Keeping

Keeping House Awheel Requires Amazing Amount Of Supplies Yearly

The affording of home comforts to overnight travellers has been developed to a high degree by the Pullman Company. Evolution of sleeping car services and facilities has kept step with the improvement of the rest of our most faithful public servants—the railroads.

Keeping house awheel as the Pullman Company does is no small task and its incidental require annual supplies of amazing proportions. A circular of the Pullman Company stated that its purchases of supplies for one year alone included 98,738,000 sanitary drinking cups, 3,822,280 boxes of safety matches, 9,144,000 paper bags for hats and 4,115,900 cakes of soap.

(No figures were cited as to the number of towels purchased each year to supply the actual and sovereign wants of travellers.)

Europe with a population of 480,000,000 has only 2,000 sleeping cars, while the United States with 122,000,000 has more than 3,000 cars whose rates are much cheaper per mile than in Europe.

Home Canning

Housewives Advised To Can Everything Possible For Winter Use

The Fruit Branch of the Dominion Department of Agriculture are giving special support to a Dominion-wide campaign to encourage housewives to can everything they can for winter use so that no surplus may be left to go to waste in field or garden. There never was such a time in Canada when there was such a crying need for relief or assistance in one form or another than at present, and the housewife, both in the rural and urban home, has a special opportunity to make use of the simple, practical and effective methods by which so much that would otherwise go to waste may be turned to the best of uses in the form of practical and appreciated relief.

Loses Love For Trains

After Many Years Man Complains About Them Passing His Door

Richard W. Oldfield of Haverstraw, N.Y., claimed to train passing his house for twenty-two years. Then Mr. Oldfield decided it was time something was done about trains in general and the New York, Ontario & Western in particular.

Eight railway trustees are investigating Mr. Oldfield's complaints that the West Shore Railroad locomotives cause "considerable annoyance" by blowing whistles and puffing smoke.

Hix: "I understand your church has a minister to Michigan for a month."

Dix: "Yes, that's right."

Dix: "For a vacation, I suppose?"

Dix: "Yes, the congregation decided that we were entitled to one."

Drought Brings Distress

Two Hundred Thousand People Affected In Drought-Are

Throughout western Canada large numbers of people are in distress as the result of repeated crop failures and although they are not included in a registration of unemployed, they probably total 200,000. Hon. G. D. Robertson, Minister of Labour, reported.

In a statement made on the number of unemployed in Canada, 150,000 men and 100,000 women were included as among those unemployed. Senator Robertson said it must be understood these people must be regarded differently from those who are unemployed, through the fluctuating forces of industrial and commercial activities.

Leaving aside those who are in difficulties from crop failures, the figures received at the department show that British Columbia has 58,850 registered unemployed; Alberta 15,450; Saskatchewan, 26,041; Manitoba, 41,688; Ontario, 150,000; Quebec, 100,000; New Brunswick, 8,000; Nova Scotia, 18,000; Prince Edward Island, 1,500; a total of 380,223.

"As unemployment registration was carried out in Quebec, the figure for that province is estimated," Senator Robertson said. "New Brunswick has a considerable anticipated increase by November, while Nova Scotia reports that in addition to the 15,000 unemployed, at least quite a number are working three days a week or less. The particular feature of the situation is that it is likely to be carried through the desolated drought areas, which exist in the three prairie provinces, and principally in Saskatchewan, where there are roughly 200,000 people suffering severely because of repeated crop failures due to drought conditions, but it is not desired to represent the unemployed as being unemployed, because very many are taking advantage of every opportunity to struggle along to support themselves and dependents, and ought to be regarded differently from those who are unemployed through the fluctuating forces of industrial and commercial activities."

Various causes contribute to indicate that registration, which is fully carried out, is not wholly reliable, especially during the summer months, as was evidenced by the chief magistrate of one of our large industrial cities indicating alarm because of the largely increased number of unemployed therein, who found, and voluntarily announced a few days ago, that unemployment had substantially decreased in that city on Sept. 1, because of the substantial number having returned to school who had been registered apparently during the holiday season. Experience also exists that a number of transients roaming about the country have registered at more than one point."

Praise For Canadian Press

United States Publisher Refers To Opposites For Promoting Friendly Relations

Responsibility of the press of Canada and the United States in promoting and fostering increasingly friendly relations between the two countries was stressed by Frank E. Gannett, publisher of the New York Herald Tribune, New York, New Jersey and Connecticut, at the press day luncheon of the Canadian National Exhibition at Toronto. Mr. Gannett said he thought the newspapers of each country should cover the news of the other country more fully.

Mr. Gannett congratulated the Canadian publishers on the high standards they have maintained and the way in which they have handled news which may be socially harmful.

Advertising In North

Enterprising Salesman Has Eye To Business In Barrens

The hand of modern advertising has moved northward, and on the great grey rocks of old Prince of Wales a brightly lithographed sign reads: "Eat so and so and you will be a Salesman." The commercial traveler placed the sign on the old fort.

The chocolate bar salesman put in a big day. "The Eskimos are eating our bars," he said.

They're worth 25 cents in trade up in the barrens. The big barrel trader 200 chocolate bars were recently sold in and Churchill the chocolate bars are popular.

Tests made by scientists prove that colour effects are as follows: Red and orange stimulate deep yellow cheeks. Green has a relaxing effect and white induces irritation.

"If I were trying to match politeness," explained the snippy customer, "I should have a difficult job to handle. Let me see your sample, madam," said the shop assistant calmly.

"Why do you give your dog so little to eat?"

"I'm giving a good ground of him." — **Lassie Miller, Zulu, Zululand.**

The Thousand Islands really number 1,002.

Plethora Of World's Goods

Suffering and Privation In The Midst Of Plenty

While the world is lightening up its belt in preparation for the coming winter, it is not for lack of plenty of good things in the world. Of staple commodities there are ample for all—tea, sugar, coffee, tin, copper, rubber and wheat.

There are 5,500,000 bushels of unsold wheat in the world. This is enough to supply bread to the nations for two years.

There are 6,000,000 tons of unsold sugar. To liquidate this surplus every human being in the world would have to consume an extra pound of sugar a month for a year.

This year's production of coffee is 56,000,000 bags or twice as much as the world's consumption. The Brazilian Government imposes an export tax of \$2.50 on each bag of coffee. This money is used to purchase surplus coffee for destruction. In one week of last season 675,000 bags of coffee were so destroyed.

Present stocks of tea in Britain alone amount to 225,000,000 pounds. To reduce this surplus, every man and woman and child would have to consume an extra two pounds of tea during the coming year.

The cotton crop is estimated at 28,000,000 bales, which with stocks on hand means a surplus of 12,000,000 bales over present needs.

Every woman in the world could have two summer frocks out of the surplus cotton. Surplus rubber stocks increased by 20,000 tons last year. Unsold copper stocks by 95,000 tons and surplus tin by 32,000 tons.

Yet the world is not over-production, as it may seem. Economists lay the blame at the door of restricted consumption, due to a love of world economy, based on falling prices, the burden of national debt and taxation, unequal distribution of wealth. Hope lies in debt cancellation and the removal of the incubus of fear.—**Regina Daily Star.**

Churchill Called Paradise For Tourists

Statement Made By U.S. President Of Canadian Tourist Association

Paradise for the sportsman and tourist lies in the Hudson Bay territory where fish and wild life abound, declared U.S. President, first board of United States tourists to visit Churchill, accompanied by Prof. S. G. Pettigill, of Carnegie Museum Expeditions. Mr. Hoover has come to a trip to Manitoba's northern shore. He is the president of the Canadian Tourist Association.

"We saw 27 white whales, from 12 to 18 feet long in Churchill harbor. These whales make great soap factories, based on whale refined will make good machinery oil," Mr. Hoover said. Sturgeon 100 and 125 pounds in weight were offered for sale for 50 cents each by Indians and trappers. "As there is no refrigeration plant at those points, and as the law prohibits exports, I am told they cannot ship this fish out," the visitor stated.

The first of the Hudson's Bay Company's 17 newspapers in New York, New Jersey and Connecticut, at the press day luncheon of the Canadian National Exhibition at Toronto. Mr. Gannett said he thought the newspapers of each country should cover the news of the other country more fully.

The Great Importance Of Experimental Farm Work In Fibre Crop Production In Canada

It would be very difficult to estimate in dollars and cents the value of the work done in Canada by the fibre division, which operates under the direction of the Dominion Experiment Farms System. The Division of Economic Fibre Production emphasizes work in a relatively large and varied field of endeavour and it is almost as directly connected with manufacturing activities as with cultural conditions.

There are some twenty projects under way at Ottawa in connection with problems that have confronted flax and hemp growers at various times. It is important to have an accurate record of the varieties best suited to the cultural and climatic conditions of Canada, and these records become more valuable as additional information is revealed from year to year.

The application of fertilizers best suited to these fibre plants offers a great field for careful investigation. This work is being carried on systematically at Ottawa as well as at a number of the branch farms extending from British Columbia to Nova Scotia, so that results may be analyzed, compared and recorded for future reference.

The central experimental farm at Ottawa is equipped with a modern mill in which flax and hemp preparing machinery of all kinds are given rigid tests. The farmer benefits from such a service because he knows that if the machinery he is interested in is given an unbiased and thorough test under government supervision, he will receive reliable information concerning it.

Then too, the fibre division of the central experimental farms system renders an extremely important marketing service.

During the year 1930 flax growing in eastern Canada received \$5.50 a bushel c.i.f. Belfast, Ireland for a special variety of flax seed known as J.W.S. This variety was originated by an Irishman named John W. Stewart, and was sent to Canada in 1928-29 for a test propagation by the Ministry of Agriculture for northern Ireland. During the year 1930-31 the price received for this special pedigree flax seed was \$4.68 per bushel. The business end of these transactions was handled by the fibre division through the Ministry of Agriculture, northern Ireland and the seed was cleaned for the farmers and inspected free of charge by the Canadian Government.

W. J. Megaw of the Ministry of Agriculture for northern Ireland stated in a letter received by the fibre division on the 20th of May, 1931, that "in counties Antrim and Derry the demand was largely for Canadian J.W.S."

This report is particularly gratifying in view of the fact that more than Canadian interests are bargaining for this market in Ireland.

During this past year farmers in the districts of Irish, Saskatchewan, and Portugal in Prairie, Manitoba, were given assistance in the handling of their respective hemp crops. This service was rendered in order to stimulate and encourage the establishment of a cordage industry in the west.

Also, this past year, a specialist was sent from Ottawa to British Columbia to carry on extensive experiments in the growing and handling of flax for fibre purposes. The results showed that British Columbia can produce a quality of fibre that compares very favorably with the best grades of Irish flax fibre.

Another service which has received favourable commendation is the installation of small demonstration flax mills in certain flax growing districts. These mills are equipped with a flax breaking machine and three or four reeling blades, as the case may be. The government supplies the machinery and the interested parties supply the accommodation and the power to run the machinery.

Hundreds of samples of the best flax fibre have been prepared and are available for examination.

"Good morning, is your mistress at home?"
"No, I'm sorry, this is her day out."—H. M. Humberg.

—W. N. U. 1907

flax seed are milled free of charge to farmers each year and applications for these samples are made to the fibre division from all parts of Canada.

When these facts have been duly considered one realizes the real value of experimental farms work in fibre crop production in Canada.

Ocean Travel De Luxe

All-Electric Kitchen Will Provide 12,000 Meals a Day on New Canadianer

A wonderful all-electric kitchen, which will provide 12,000 meals a day, is being planned by the catering experts of the Cunard Line for the new 73,000-ton liner now being built at Clydebank.

The liner will carry over 3,000 passengers and 900 crew, and for the big task of feeding them 100 highly-paid chefs will be employed in the all-electric kitchen. The kitchen has many novel devices, including machines for keeping the ovens and grills at certain temperatures and instruments which wash thousands of plates and dishes in a few minutes. It will also be possible to cook simple dishes without attention.

The wine experts of the company have evolved new methods to ensure that all wines will be kept in perfect condition even though the liner may be running through heavy weather. When are purchased five years before they are used in the liner, and for years now the wines for the new Canadianer's cellar have been waiting for the maiden voyage. The cellar will be one of the largest and best in the world.

Great progress is being made in the construction of the Canadianer's castings for the gear wheels and turbines, and the stern bracket, one of the largest ever made, are nearing completion at Darnley and Sheff. Half the boiler installation is complete, and 1,000 miles of electric cable are ready for installation.

Bonds Of Empire

Earl Jellicoe Refers To Important Part Played By Canada

Great Britain is looking to Canada to provide a lead in strengthening the British Empire, declared Earl Jellicoe, president of the British Empire Service League, addressing an Empire Club luncheon at Toronto. Coupled with this remark was his confident assurance that Britain would surmount present difficulties and emerge successfully from the national crisis.

The Admiral of the Fleet recalled feeling which existed in the Dominion of Canada when he visited that country in 1914. He stated that such feeling might never lead to action.

The observation of Empire Day in Canada developed from that feeling, he said. "It is well that our children should realize the common loyalty which binds the Empire; the tie of blood and the tie of respect and honor which we give to our king."

"Canada has played an immense part in the empire's work," Canada has fought in the common cause, and I have no doubt she would do it again."

We of the Mother Country will look to Canada to give us a lead in the strengthening of the ties of Empire."

Radium Not Cure-All

But Has Accomplished Much In Treatment Of Cancer

Cancer control was the greatest problem of health today, and radium had come to the fore as a potent agent. It was not a panacea, for even in skilled hands its results were often disappointing, but, on the whole, the use of radium could look with satisfaction upon what it had already accomplished. Dr. Joseph Muir, (and New York cancer expert and physical therapist, stated in addressing the convention of the American Association of Physical Therapy, held at Montreal.

Southern Alberta Wool Shipments of wool from Southern Alberta to the Canadian Co-operative Wool Growers' warehouse at Weston, Ont., have broken all records, according to a report issued by N. F. Macleod, secretary of the Southern Alberta Sheep Breeders' Association. Deliveries made to date aggregate 1,500,000 pounds, the wool clip being unusually heavy this year.

If a man listened to a continuous broadcast for a week the batteries would run down . . . thank goodness!

—H. M. Humberg.

Growing Habit Of Buying Empire Goods Gains Impetus In The United Kingdom

Wilkins' Trip Important

Only Way Certain Scientific Phenomena Can Be Obtained

State of the bottom of the sea among other scientific things, has drawn Sir Hubert Wilkins, submarine polar explorer, into great danger, in the opinion of Vihajmar Stefansson, who once led Sir Hubert on an other polar trip.

Infrequently heard from, Sir Hubert is now in the great Arctic ice pack about 350 miles from the north pole, Mr. Stefansson said. "Sir Hubert undoubtedly cannot much longer delay his return from the ice because the summer season virtually is finished."

Mr. Stefansson emphasized the importance of Sir Hubert's trip, explaining that in no other way certain important scientific phenomena can be obtained.

"Star dust is probably the most dramatic of these phenomena. Scientists hold that dust from outer space is deposited in the polar region in comparative purity, whereas in other parts of the world it is mixed with terrestrial dust. Obviously any samples that Sir Hubert can obtain from the bottom of the sea will be of use to science."

"Sir Hubert also seeks to weigh the earth from the north which is the shortest radius to the centre of the earth. The earth already has been weighed from the equator, where the radius is longest, and a comparison of the two weights will disclose important phenomena about, among other things, the mineral constitution of the earth."

"By use of the Sine depth finder, Sir Hubert can make an almost unbroken contour map of the bottom of the Arctic sea. Sir Hubert also can observe water life in the Arctic sea as no other explorer could—by actually being under the surface where the life exists. He also can make important weather observations, investigate water temperatures and otherwise fill in the innumerable gaps that exist in our Arctic information."

"Probably three years will be needed for the completion of the work of the expedition."

How To Keep Milk

Keeping Milk In Proper Condition For Home Use

Four little words tell the whole story about how to keep milk in proper shape for use in the home. These are "Clean, Cool, and Covered." This is one of the fundamental rules of home economics to which the Dairy and Cold Storage Branch calls special attention. For best results milk should be served at the end of the meal, and it should always be sipped slowly. Milk is the ideal food for children of all ages because of its high quality and quantity of protein, its abundance of calcium, its readily assimilable phosphorus content, its and its easily digested fat and sugar.

Industrial Moose Jaw

Moose Jaw now has an industrial area of about 50 city blocks, the city council having set aside three subdivisions for the purpose—Prairie Heights, Westmore and Sunnyside. The area lies roughly between the main line of the Canadian Pacific and the Outlook line branch.

"A considerable amount has graded No. 1 hard, a great deal has gone No. 1 Northern, and some has graded No. 2 Northern on account of mixtures of durum and barley."

Records made by a "piano camera" show that a pianist does not strike all the notes of a chord at once, but uses from .01 to .37 seconds to complete the chord.

Education is the first aid to finding out how little you really know.

Year's Crop Is Noted

Director (to chauffeur): "Why did Mr. Brown dismiss you after so many years' service?"

Chauffeur: "I had to drive his mother-in-law to the station and I arrived two minutes late."—En Roig

Half Trains, Goldenburg.

"The growing habit of buying from within the Empire has attained an impetus in the United Kingdom," says the report of the Empire Marketing Board just published, "which even the world-wide economic depression has been powerless to retard."

The report for 1929-1930 shows that twenty-five new records had been set up, in the year under review, by Empire foodstuffs, as regards volume of imports into the United Kingdom. Apples from Canada and from New Zealand reached record quantities in 1930, as did bananas from the British West Indies, butter and cheese from New Zealand, coffee from British East Africa, currants from Australia, eggs from Australia and South Africa, grapefruit from South Africa and Palestine, lamb from New Zealand, oranges, peaches, plums, sugar and wine from South Africa, and various other Dominion, and tobacco from India.

A number of other foodstuffs are mentioned which surpassed all previous years, except 1929. These include raisins, saffron and safflower, New Zealand frozen pork, Ceylon tea, Australian sugar, and British Malt and canned pineapples.

The people of the United Kingdom are reported to be buying steadily more and more from within the Empire. Many factors have combined to bring about this result. First, more attention is being paid today by Empire producers to the need for grading and orderly marketing. Secondly, distributive traders have shown themselves resolved to further the progress of Empire buying on sound economic lines. Thirdly, the contact between producers overseas and wholesale and retail traders in the United Kingdom is growing closer. Fourthly, consumers in the United Kingdom are becoming more aware of the excellence and wide range of Empire products.

Since the report was issued, the records of Canadian cattle on the hoof, both for further feeding and for slaughter at port have been resumed on a considerable scale and it is possible, if the hog runs this fall justly, that Great Britain will increase before the end of 1931.

Manitoba Wheat

Test Shows High Protein Content This Year

Dr. F. H. Birchall of the research laboratory of the Canadian Board of Grain Commissioners, in a test made for protein content in the wheat crop of Manitoba, shows that the wheat crop of the province has a maximum of 18.3 per cent, as against a maximum of 14.5 per cent last year and a minimum of 10.2 per cent, this year as compared with 12.4 per cent last; the average being 18.25 per cent, against 11.0 per cent in 1930. The test grains were taken from the same districts as last year.

Grain Grades High

Especially High Quality Of This Year's Crop

"Grain which has passed through the inspection department at Winnipeg in the last few days is of exceptionally high quality," it was stated by J. D. Frazer, chief grain inspector at Winnipeg, in a recent address before the officials of the World's Grain Exhibition and Conference at Regina. "A considerable amount has graded No. 1 hard, a great deal has gone No. 1 Northern, and some has graded No. 2 Northern on account of mixtures of durum and barley."

Records made by a "piano camera" show that a pianist does not strike all the notes of a chord at once, but uses from .01 to .37 seconds to complete the chord.

Education is the first aid to finding out how little you really know.

LONGEST SINGLE SPAN BRIDGE IN THE WORLD

Here's a striking aerial view of the Sydney, Australia, harbour bridge, which has been seven years in construction, at a cost of nearly \$40,000,000. As the longest single span bridge in the world, it will carry four lines of vehicular traffic, two electric train tracks and two street car tracks, as well as two foot-bridges for pedestrians only. One million passengers will cross the bridge daily, it is estimated.

Mrs. D. Robertson, returned
from Calgary, Monday.

Mrs. Shields, sr., returned
from a visit to her daughter, in
Calgary, on this week.

The Chautauqua Advance
Agent was in town on Friday
last and met with the local
committee.

Miss Winnie Rowles, who has
been with the Chautauqua as
superintendent on Eastern circuits
has arrived home.

The Ladies of the Empress
United Church will hold their
annual Bazaar and Tea on Saturday,
October 10.

Miss Grace Clott, who has
been visiting at the home of
her father in the States, arrived
back on Saturday.

Glaude O'Leary is a patient in
the hospital suffering from influenza.

Miss S. Mahura and Miss B.
Flock, left this morning by
car for Calgary and Lethbridge.
Miss Mahura starting on her
holiday vacation.

J. Westburg reports that the
I.H.C. implement agency has
been transferred to the Empress
Hardware.

As a result of a riot at Estevan
of striking miners, four
miners are reported dead, with
a number of miners and police
injured.

Miss M. Flock, matron of the
Empress Cottage Hospital, arrived
back from her holiday vacation
on Friday last. She was accompanied
by her sister Miss B. Flock, who has
been visiting here.

Mrs. Shields, sr., who has
been spending an extended visit
here with her son and daughter-in-law,
Rev. and Mrs. G. A. Shields left
on Wednesday morning for her home in
Ontario.

Rev. Knowles, of Youngstown,
Rev. Orme, of Hemarqua,
Rev. Parsons, Alaskan and Rural
Denn Hazel, Lovarna, and Mr.
Brown, student of Major, S. A.,
were visitors in town on Monday,
and attended a parishioners
meeting of St. Mary's Anglican
Church.

In a small village in Ireland,
the mother of a soldier and the
village priest, who asked her
if she had had news. "Sure,
I have," she said, "Pat has been
killed."

"Oh, I am very sorry," said
the priest. "Did you receive word
from the war office?"
"No," she said, "I received
word from himself."

The priest looked perplexed,
and said, "But how is that?"
"Sure," she said, "he is the
letter; read it yourself."

The letter said: "Dear mother,
I am now in the Holy Land."

Here and There

(404)
Differences in the price of wheat
at Chicago and Winnipeg and re-
tarding of the wheat movement in
western Canada is due to the view
of Canadian wheat owners that the
good quality justifies holding it for
higher prices while British and
continental buyers believe they can
obtain their present requirements
from the Argentine and the United
States, is the explanation of this
condition given out in a statement
recently issued over the signatures
of E. W. Beatty, chairman and
president of the Canadian Pacific
Railway and Sir Henry Thornton,
president of the Canadian National
Railway. Until the present im-
passe between buyer and seller is
adjusted there will be a practical
stoppage in the movement of grain
with consequent serious effects on
gross and net earnings of both the
rail and water carriers.

Travelling 300 miles north of
Edmonton over the waterways
branch of the Northern Alberta
Railway to Waterways and Port
McMurray, E. W. Beatty, chairman
and president of the Canadian
Pacific Railway, accompanied by a
number of directors of the rail-
way, inspected the salt wells and
tar sand deposits of the region.
Experts of the Canadian Pacific
and Canadian National Railways
are at present examining these de-
posits which Mr. Beatty said he was
sure would be a great asset to
Alberta.

Delegates from the Canadian
Chambers of Commerce who have
been travelling extensively in the
west of Canada, mainly over Cana-
dian Pacific lines, have through
their national committee reiterated
their stand in favor of a continu-
ation of assisted immigration of se-
lected British settlers of a desirable
type to Canada.

Charles Reid, of the Banff
Spring Golf Club, won the Prince
of Wales golf trophy, famous and
coveted prize of golfers, from a
field of 427 competitors recently.
His score was 141 net, his handi-
cap being 17. This is the first
time in the history of the competi-
tion that the cup has gone to a
Banff player, Calgary golfers hav-
ing taken it to that city on the rail-
way for the four former competitions.

Canada's reindeer industry takes
a big forward step this year with the
trick of 3,000 northern animals
from Alaska into the Dominion. In
November this herd, secured by
Canada from the United States
herds in Alaska, will begin a trek
which will take 18 months and
will land the animals in 1931 on
the Arctic coast east of the Mac-
kenzie river.

Australians are "fiercely loyal"
so far as Empire Trade is concerned,
and buy, for example, 38 per
cent of their automobiles from
Canadian manufacturers. Sir James
Muirhead, member of the Legislative
Assembly of New South Wales, told
the Vancouver Canadian Club re-
cently. Sir James had just re-
turned from a cross-Canada tour by
Canadian Pacific line and was on
his way back to Australia.

Settlers in the Peace River country
have a definite uniformity of
outlook regarding the progress of
the country as a whole and Col. J.
S. Dennis, Civil Commissioner of
Colonization and Immigration of
the Canadian Pacific Railway, who
has been inspecting the northern
part of Alberta, over the Northern
Alberta Railway. He was aston-
ished at the readiness of the Branch
of Trade and Individual Business
men in this area to work together
where it might work temporary
hardship locally.

Health Service

OF THE
Canadian Medical Association

GRANT FLEMING, M.D. — ASSOCIATE SECRETARY

Co-operation
Co-operation is a word which
is used rather too freely; also,
it has been used to such an ex-
tent that some people are apt
to be irritated when told that
they should co-operate. Never-
theless the term does express
the idea of working together,
of team play, and it is about
this which we wish to say some-
thing to our readers.

The schools are now open,
and the parents of the school
children are naturally anxious
that their children should be
well in school and secure the
greatest benefit possible out of
the time given to their studies.
The entire responsibility for
this does not rest on the school
staff. The parents have their
part to play, which is more
than simply paying school tax-
es. If the best results are to be
obtained, parents must co-operate
with the school, and the
school with the parents.

The child should be properly
prepared for school. The child
who has diseased tonsils, or
who cannot breathe properly
through his nose on account of
adenoids is not properly pre-
pared for school. His time
there will not be spent to the
best advantage. The school can-
not alter this condition, but the
parent can.

The child who requires glasses,
is handicapped until he is
properly fitted with the glasses
he needs. Toothache will dis-
tract the attention of the bright-
est child. Running ears lead to
deafness.

All this means that parents
should see that their children
have all their defects corrected
by proper treatment, as it is
only in this way that they are
given a fair chance to develop
properly and to profit by their
time at school. The most that
the school doctor or nurse can
do is to advise parents to take
their children to the family doc-

tor for whatever treatment
they require. If there is no
school doctor or nurse, the par-
ents would be well advised to
have their doctor examine their
children, for even though they
may appear to be well, they
may be suffering from some
condition which requires at-
tention.

Health is closely related to
proper diet. The school child
is active and is growing, so that
he requires, in abundance, food
that will provide energy and
building materials. The ade-
quate breakfast which should
begin the day, and which should
have been allotted to it sufficient
time in which to eat it, means
that the child should go to bed
early enough to have long hours

of sleep and to be rested when
it is time for him to get up.
When the noon meal is to be
taken at the school, parents
should interest themselves to
see that there is provided a
clean place for eating, and that
there is also provision for some
hot food during the cold sea-
son. Parents are responsible
for the feeding of their child-
ren, and they should work in
conjunction with the school to
secure a proper noon meal for
the school children.

The school is expected to do
a great deal for the child. What
it can do depends in large mea-
sure upon the helpful co-opera-
tion given by the parents to the
school in the common interest
of the welfare of the child.

"SERVICE and SATISFACTION"

A Happy Quartette at Empire Games

It was a great day at Hamilton, Ont., when the British Empire
Games were opened: a day of sunshine and smiles, as is shown by
the above picture of four distinguished Canadian citizens in the vic-
torial box. Whatever the smile is born of, it is unanimous. Left
to right: E. W. Beatty Chairman and President of the Canadian Pacific
Railway; His Excellency Viscount Willingdon, Governor-General of
Canada; Hon. R. B. Bennett, Prime Minister of the Dominion; and
Hon. J. Howard Ferguson, Prime Minister of the Province of Ontario.
